Project

Weather App - **React JS | Material-UI | API Integration**

1. Hourly and Weekly weather forecast for searched city or any named location.
2. **Responsive & Modern UI** built with React and vanilla CSS.
3. Integrated **OpenWeather API** for real-time weather data and **GeoDB API** for city suggestions.

Portfolio page - **React JS | ResponsiveUI | Animations**

1. Personal portfolio showcasing projects and skills with contact info and github profile.
2. Used lots of Animation and effects.
3. All of my projects are shown with video and decription.

Simon Say Game & Color Generator - **vanilla js | vanilla css**

4. Simon Say Game is a memory game made with vanillajs with mode switch option.
5. Generate random colors on factors like usecase, family, mood & shade.

Expense Tracker - **Chart JS**

1. Expense tracker for organising and monitoring daily expenses.
2. Monthly & Weekly spending comparison with bar graph.

Experience: *I am a Fresher (2nd year Student)*
